Force

- » Peak: 156 - 780 N
- » Continuous: 42 - 102 N

Maximum Velocity

- » Up to 8.5 m/s

Feedback

- » Built-in position sensor
- » 1V pk-pk sin/cos
- » 12 micron repeatability
- » Optionally with high resolution encoder

Range of motion

- » Strokes up to 1151 mm

Dimensions

- » W x H: 110 x 164 mm
- » Rod diameters: 25 mm

Applications

- » Packaging
- » Material Handling
- » Automated Assembly
- » Bio-medical

The OEM advantage

- » Easy integration
- » Flexible position control
- » High speed and acceleration
- » Clean, quiet operation
- » Low maintenance

The ServoTube Module with fully integrated bearing rail and position encoder offers unprecedented value in high performance applications. The ServoTube Module is a cost effective alternative to ballscrew and belt drive systems where high speed and flexibility are required.

Four models deliver a continuous force of 42~102 N (9~23lb) with peak forces of up to 780 N (175lb). Standard stroke lengths of 14~1151 mm are available.

The patented magnetic design of ServoTube generates 12 micron (0.47 mil) repeatability and 350 micron (14 mil) absolute accuracy, from a non-contact, integral position sensor. The standard ServoTube position encoder output is an industry standard 1V pk-pk sin/cos signal. For applications requiring higher levels of accuracy, the ServoTube Module is available with a fully integrated optical position encoder giving a resolution of 1 micron.

The non-contact nature of the direct linear drive results in life expectancy far above that for typical belt drive and ballscrew systems, with the added advantage of no deterioration in accuracy or repeatability over the entire life of the product.

The ServoTube Module is an ideal OEM solution for easy integration into pick-and-place gantry and general purpose material handling machines. The load is mounted directly to the forcer giving a very stable base. Servotube Modules can be easily integrated with each other or with other ServoTube products to create multi axis systems with minimal design effort.

The ServoTube has superior thermal efficiency, radiating heat uniformly. High duty cycles are possible without the need for forced-air or water cooling.

where L = Length in mm			

FEEDBACK

The ServoTube Module is available with three feedback options with option S supplied as standard.

Option S feedback outputs analogue, differential sine and cosine signals for providing position feedback. Shown below are the relationships between forcer phase back EMF and position sensor outputs for one direction of motion (as shown by arrows). It should be noted that +SIN or -SIN is always in phase with forcer phase U. For the motion shown, -SIN is in phase with forcer phase U. For motion in the opposing direction +SIN is in phase with forcer phase U.

OPTION S SPECIFICATION	Sx25	units
Output signal period	51.2	mm
Signal amplitude (between +/- signals)	1	V _{pk-pk}
Output current	± 10	mA
Supply voltage	5 ± 0.25	V _{d.c.}
Supply current (output current=0)	15 ± 5	mA
Resolution ⁽¹⁾	12	µm
Position repeatability ⁽²⁾	± 12	µm
Absolute accuracy ⁽³⁾	± 350	µm

Notes: -

⁽¹⁾ Dependent on amplifier (indication with 12 bit resolution)

⁽²⁾ Dependent on amplifier. Under constant operating conditions. Self-heating of the forcer will cause expansion in the thrust rod during the initial warm up period. In high duty applications (corresponding to an internal forcer temperature of 80°C) a 1 metre thrust rod will expand typically by 250 µm.

⁽³⁾ Maximum error over 1 metre under constant operating conditions.

If improved positional accuracy is required, then in addition to option S, one external encoder option is available.

Option C uses the Renishaw RGH24X optical encoder. This option provides two channels, A and B, in phase quadrature (90° phase separated). A reference channel, Z, is also available that produces a single output at a position set by a reference mark.

SPECIFICATION	OPTION C	units
Signal output	EIA RS422A	-
Supply voltage	5 ± 0.25	Vd.c.
Supply current (output current=0)	120	mA
Supply current (outputs terminated with 120R)	195	mA
Resolution	1	µm
Position repeatability ⁽¹⁾	± 1	µm
Absolute accuracy ⁽²⁾	± 10	µm

Notes: -

⁽¹⁾ Dependent on amplifier. Under constant operating conditions.

⁽²⁾ Typical maximum error over 1 metre under constant operating conditions.

Connections are available via a 9-way D-sub male connector.

FUNCTION	+5Vd.c.	0V	A+	A-	B+	B-	Z+	Z-	Screen
PIN NUMBER	5	1	2	6	4	8	3	7	CASE

FORCER OVER-TEMPERATURE SENSOR

It is strongly recommended that the forcer over-temperature sensor is connected to the drive amplifier or servo controller **at all times** in order to reduce the risk of damage to the forcer due to excessive temperatures.

Protection is provided by three positive temperature coefficient (PTC) thermistors embedded in the forcer phases. As the forcer phase temperature approaches 100°C, the PTC thermistors exhibits a sharp increase in electrical resistance. This change in resistance can be detected by circuitry within the drive amplifier or servo controller and used to reduce or disable the output of the drive amplifier in order to protect the forcer.

SPECIFICATION	VALUE	units
Resistance in the temperature range -20°C to + 70°C	60 to 750	Ohms
Resistance at 85°C	≤1650	Ohms
Resistance at 95°C	≥3990	Ohms
Resistance at 105°C	≥12000	Ohms
Maximum continuous voltage	30	Vd.c.

FORCER ELECTRICAL CONNECTIONS

Connections are made within the termination box.

PIN NUMBER	FUNCTION
1	Phase U
2	Phase V
3	Phase W

8	-TH (Thermistor)

CABLE

The ServoTube Module has two separate cables providing connections for forcer power and position sensor. The cables are available in 3 metre, 5 metre and 10 metre lengths.

SPECIFICATION	POWER	SENSOR
Overall diameter (nominal)	8.0mm	5.8mm
Outer jacket material	PUR	PUR
Number of conductors	4	4 x twisted pair
Size of conductors	1.5mm ² (16 AWG)	0.14mm ² (26 AWG)
Screened / Unscreened	Screened	Screened
Minimum bending radius - flexible routing	42mm	42mm
Operating temperature - flexible routing	-15°C to +80°C	-15°C to +80°C
Operating temperature - fixed routing	-30°C to +80°C	-30°C to +80°C

CABLE TERMINATION

The ServoTube Module cable is available with three termination options. **Option F** has the wire ends stripped and solder tinned ready for termination. All other options are terminated with connectors that plug directly into the desired amplifier. The connections for all options are shown below: -

SENSOR FUNCTION	D - (XTL-S)	N - (ESR-Pollmeier)	F - (Flying leads)
+SIN	14	6	Blue
-SIN	13	7	Red
+COS	12	11	White
-COS	11	12	Brown

Connector type	4-way 5mm pluggable terminal	4-way pluggable terminal	-
Amplifier connection	J2	X3	-

LIMITS

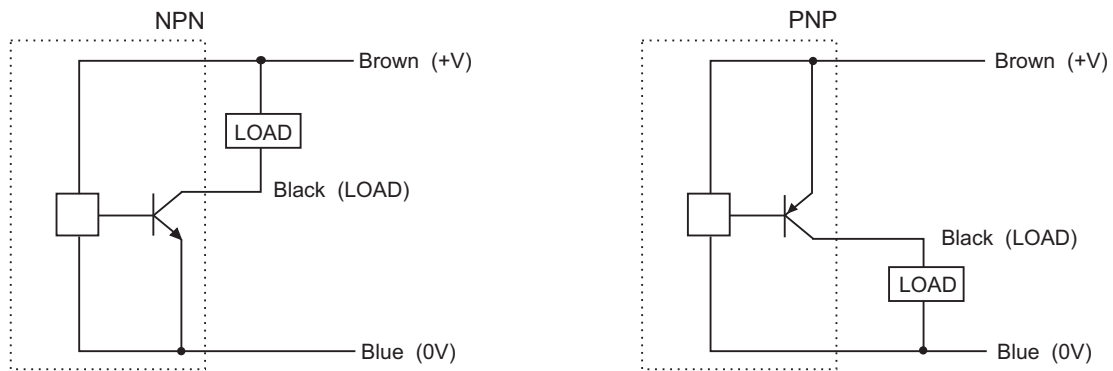

These limit switches are not intended as safety devices or as part of a system intended to ensure personal safety. When two switches are mounted in close proximity (as in the case of a left and right limit switch), a minimum of 30mm spacing between sense areas must be maintained.

If required, the ServoTube Module can be supplied with limit switches. There are two types available, NPN output and PNP output. Each output type is available with 2 metres of robotics cable. Each limit switch position is adjustable and switching is achieved by an actuator vane mounted on the forcer. Electrical connections are made via wire ends stripped and solder tinned ready for termination.

SPECIFICATION	VALUE			
	minimum	typical	maximum	units
Supply voltage	10	24	30	Vd.c.
Supply current	-	15	-	mA
Sink current	-	-	100	mA
"Closed" voltage	-	-	1	Vd.c.
Frequency response	-	-	600	Hz

The output for all types can be either a normally closed (NC, opener) or normally open (NO, closer) open collector transistor. A red indicator shows the output status.

DRAG CHAIN

Size 15.3 is standard. Smaller drag chains on request.

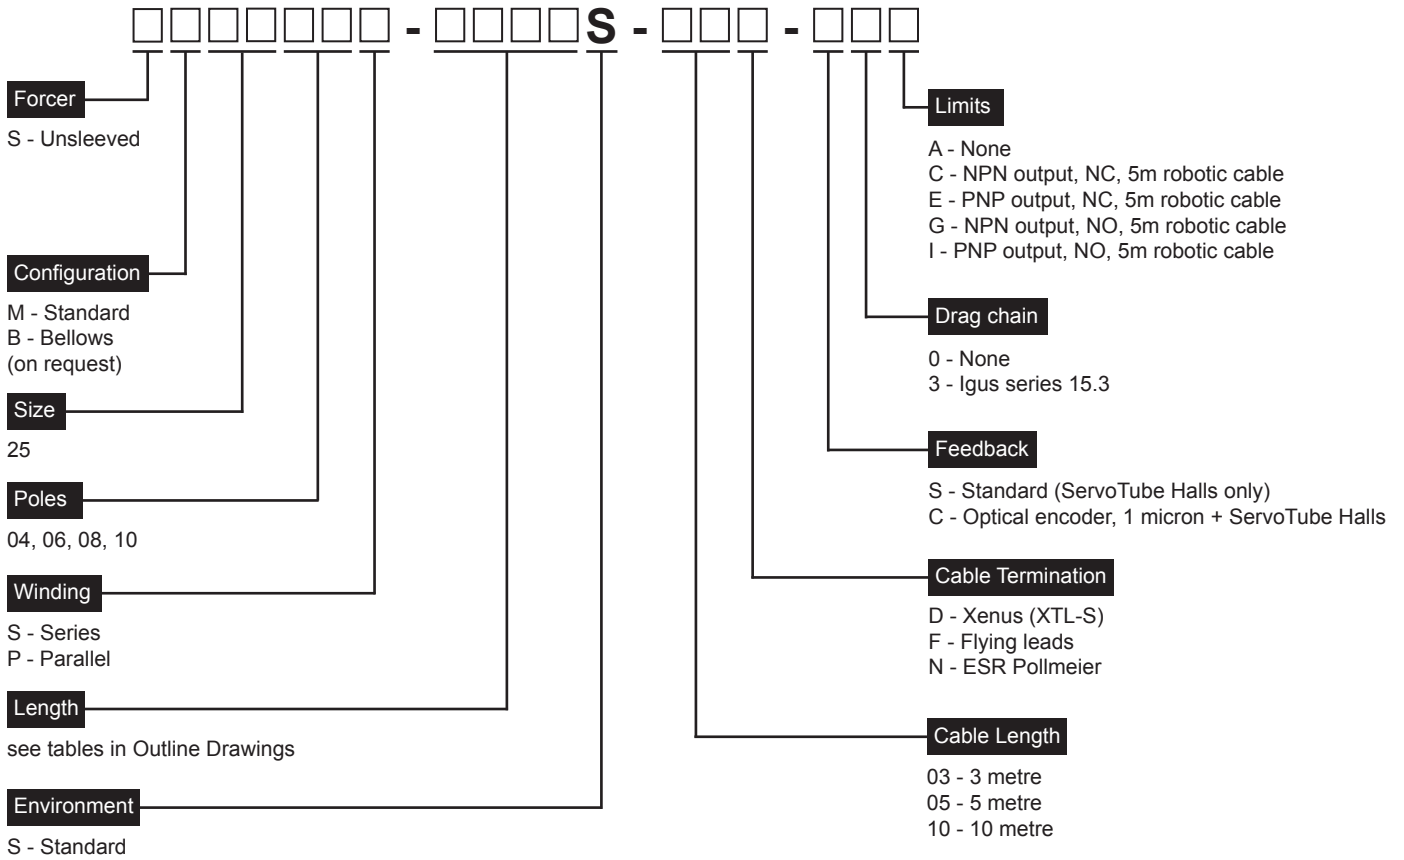

ENVIRONMENT

The ServoTube Module is intended for use in an environment within the following conditions: -

SPECIFICATION	VALUE
Operating temperature	0°C to +40°C
Storage temperature	-20°C to +70°C
Altitude (above mean sea level)	1000m
Overvoltage category	II
Pollution degree	2
EMC	light industrial
